SUMMARY

Detail-oriented and motivated BCA graduate from Sant Gadge Baba Amravati University with strong proficiency in Python programming, object-oriented programming (OOP), and software development lifecycle (SDLC). Skilled in developing scalable applications using modern tools and agile methodologies. Hands-on experience with Git, debugging, testing, and database management (MySQL). Strong problem-solving abilities with a focus on writing clean, efficient, and maintainable code. Seeking an entry-level Software Engineer / Python Developer role to contribute to innovative projects at leading organizations .

TECHNICAL SKILLS

- **Programming Languages:** Python (Advance) , C, C++, Java, R.
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, SDLC
- **AI/ML:** Machine Learning Basics, Face Recognition System, Data Preprocessing
- **Libraries & Tools:** OpenCV, NumPy, Pandas
- **Web Technologies:** HTML, CSS, JavaScript (Basics)
- **Database:** MySQL, SQLite
- **Frameworks:** Flask
- **Tools & Platforms:** Git, GitHub, VS Code , TRAE
- **Other Skills:** Excel, PowerPoinnt, Canva ,Debugging, Problem Solving, Code Optimization, Testing

EDUCATION

Bachelor of Computer Application

Jun 2023 - May 2026

Sant Gadge Baba Amravati University

- Final CGPA: 7.80

INTERNSHIP'S WORKS

Upskill Campus : Full Stack Java Developer Intern

June - July 2025

- Developed a full-featured banking system with user authentication, account management, and transaction handling.
- Implemented backend logic using Java and database integration.
- Ensured secure and efficient data handling with proper validation.
- Tech Stack: Java , MySQL, HTML, CSS

Interns Studio : AI and MI Intern

Jan - Feb 2024

- Developed a Face Recognition System using Python, Artificial Intelligence (AI), and Machine Learning (ML) for real-time identification and verification of individuals.
- Implemented image processing and feature extraction techniques using libraries like OpenCV and NumPy, improving detection accuracy and performance.
- Trained and tested ML models for facial detection and recognition, and optimized the system through data preprocessing, debugging, and performance tuning.

PROJECT

SmartHire – Recruitment Management System

SmartHire is a web-based recruitment management system designed to streamline the hiring process by managing job postings, candidate applications, and basic screening efficiently.

Key Features & Responsibilities:

- Developed a system to manage job listings and candidate applications, improving the recruitment workflow.
- Implemented resume filtering and candidate data management for efficient shortlisting.
- Designed a user-friendly interface for recruiters and applicants using basic web technologies.
- Built backend logic using Python to handle data processing and application flow.
- Integrated database (MySQL/SQLite) for storing candidate and job-related data.
- Performed testing, debugging, and performance optimization to ensure smooth functionality.
- Technologies Used:
 - Python, HTML, CSS, JavaScript, MySQL/SQLite
- **GitHub Link:** <https://github.com/Sayali283/SmartHire>

KEY SKILLS

- Communication Skills
- Problem-Solving Ability
- Analytical Thinking
- Teamwork & Collaboration
- Adaptability & Flexibility
- Time Management

CIRTIIFICATION

- Python Certification from Elegant IT
- Data Analytics by Delloite
- Cyber Security by Delloite
- Tally ERP by SGBAU
- Web Development by Tamizhan Skills
- AI and ML by Interns Studio

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.

Place: Yavatmal, Maharashtra
